**Senior Staff:** 

Tim Burke

Field Office Manager

Alturas BLM

708 West 12<sup>th</sup> Street Alturas, CA 96101

Phone: (530) 233-7904

Fax: (530) 233-5696

Tim\_burke@blm.gov

### **Executive Summary**

• The Bureau of Land Management (BLM) is interested in obtaining the lands outlined in the attached map (Attachment 1) because they are near public lands which the BLM already manages. Acquiring fee simple title to these lands would provide the BLM an opportunity to manage contiguous open space for current and future generations; providing increased access for public recreation, fish and wildlife habitat monitoring and improvement projects, and preservation of cultural and historic points of interest.

The BLM has a full time staff of specialists such as; recreation planner, botanist, wildlife biologist, forester, and archeologist who are well versed in managing a variety of lands for the public. The BLM, Alturas Field Office (AFO) currently manages land within the Pit-McCloud River Watershed and is familiar with the sensitive species, cultural resources, and noxious weeds found within the watershed. The BLM has specific protocols in place for consultation with the U.S. Fish and Wildlife Service regarding endangered species and with the State Office of Historic Preservation regarding cultural resources. The Field Office also consults regularly with the Pit River Tribe regarding a wide range of resource management issues and coordinates with Shasta County to help reduce the spread of noxious weeds. Coordination efforts also involve Lassen National Forest, California State Parks, Fall River Community Services District, and local interest groups such as the Spring Rivers Foundation.

### **Organizational Information**

- A federal entity
- Department of the Interior, Bureau of Land Management, Alturas Field Office
- Alturas BLM
- As a federal entity the BLM is tax exempt
- See attached letter of support from the BLM California Acting State Director (Attachment 2)

### Rationale for Applying

• The BLM is interested in obtaining the lands outlined on the attached map because they are adjacent to public lands which the BLM already manages and would allow for public access to the Fall River. Acquiring fee simple title to these lands would provide the BLM an opportunity to manage contiguous open space for current and future generations; providing increased access for public recreation, fish and wildlife habitat monitoring and improvement projects, and preservation of cultural and historic points of interest.

### **Organizational Mission**

• It is the mission of the BLM to sustain the health, diversity and productivity of the public lands for the use and enjoyment of present and future generations. As a public land management agency, the BLM is committed to managing lands for the long-term.

### **Geographic Focus**

Fall River Valley (129 acres fee title, 8 acres easement)

The AFO currently manages several hundred acres of public land within less than one mile of the area of interest, including the Timbered Crater Wilderness Study Area.

The staff members of the AFO are intimately familiar with the resources of the area and have ongoing working relationships with local community members as well as the Pit River Tribe and Shasta County Board of Supervisors.

### **Organizational Experience and Capacity**

• In cooperation with the United States Forest Service and counties within a 6.5 million acre planning area, the AFO led development of and is currently implementing a sagebrush steppe restoration strategy. The goal of the strategy is to reduce western juniper encroachment in an environmentally responsible manner utilizing prescribed fire, mechanical and hand treatment techniques. For the first decade of the implementation the agencies have a collective objective of treating 14,000 to 21,000 acres annually.

In cooperation and coordination with the U.S. Fish and Wildlife Service, Shasta County, the Spring River Foundation, and the general public the AFO developed and has ongoing management of the BLM's Pit River Campground. The campground is located in the center of the Fall River Mills Planning Unit and provides the public with an outstanding recreational opportunity.

The AFO has also developed interdisciplinary management plans focusing on riparian restoration in areas such as Cedar Creek and Fitzhugh Creek.

• The AFO currently manages approximately 503,000 acres of public land throughout Modoc, Shasta, Lassen, and Siskiyou Counties.

### **Organizational Finances**

- The AFO has an annual resource and fire management budget of \$2 million. The BLM has never received anything other than a clean budget audit review.
- The United States of America, and its assigns would take title to the land. Any money given to BLM from the Stewardship Council would be used on those specifically identified projects within each parcel that the funds were requested for. By law timber or lease revenue funds are deposited in the Treasury. However, funds to be expended by the AFO will far exceed potential revenue.

### **Key Personnel/Staff**

- Tim Burke, Field Office Manager
- Claude Singleton, Recreation Planner
- Arlene Kosic, Wildlife Biologist
- Jack Scott, Archeologist
- Peter Hall, Forester
- Kiley Whited, Rangeland Management Specialist
- Jerry Wheeler, Fire Management Officer
- Dave McKirahan, Engineer Technician
- Emily Jennings, Realty Specialist/NEPA Coordinator
- Mike Dolan, Botanist

### **Community Engagement and Collaboration**

• The AFO staff has extensive community engagement and collaboration experience in communities throughout the resource area and is currently initiating planning for the Cinder Cone Off Highway Vehicle area involving public meetings and field tours. The BLM also has an obligation under the National Environmental Policy Act to include and collaborate with the public during the development of any land management plan.

### **Legal Compliance and Best Practice**

• The AFO signed a Record of Decision for the Alturas Resource Management Plan (RMP) in April 2008, which is in accordance with the Federal Land Policy and Management Act of 1976 and the National Environmental Policy Act of 1969.

The BLM also operates under Best Management Practices described throughout the Code of Federal Regulations and Departmental Policies and Memorandums.

### **Conflict of Interest Disclosure**

 Karla Norris, Assistant Deputy State Director in the BLM California State Office, is a non-voting member of the Stewardship Council's board.

### PART 2 - LAND STEWARDSHIP INFORMATION

### **Land Interests Sought**

• Please identify the specific parcel(s) or portions of parcels that your organization is interested in receiving in fee title. Please refer to the background information packet for parcel identification numbers and approximate acreage.

The Bureau of Land Management (BLM), Alturas Field Office (AFO) is interested in approximately 129 acres of fee title and approximately 8 acres of easement land within parcel ID #181.

• Please indicate if the transfer of the watershed lands identified above would require a lot line adjustment, boundary survey, or legal parcel split. Please describe any proposed lot line adjustment, boundary survey, or parcel split and indicate why the proposed measure is necessary and how the proposed lot line adjustment or parcel split would contribute to the preservation and enhancement of the BPVs. Please include these costs in your organization's budget and funding plan and indicate if your organization would contribute funds for these costs.

There may be a need for a legal parcel split along Fall River where the FERC boundary divides the parcel. The BLM is concerned this division of the parcel would hinder the ability of the agency to meet the Beneficial Public Values (public access to Fall River) outlined in the Stewardship Council Land Conservation Plan, Volume II because the agency would not be able to manage the land within the FERC boundary adjacent to Fall River. If it is not possible for BLM to acquire fee title to the area within the FERC boundary then the agency would request to hold the conservation easement over the acres within the FERC boundary and on the north side of the river to facilitate management and use.

There is a potential for BLM cadastral surveyors to assist in the survey on the south and west portions of Fall River in a cost share agreement with the Stewardship Council should the Council deem the parcel split necessary.

• Please provide an overview of your organization's internal process for approving the acquisition of, and completing the transaction associated with, real property.

The acquisition of the fee estate on parcels of land provides BLM the opportunity to protect threatened natural and cultural resource values, critical habitat and ecosystems, historic and cultural sites, and fulfill the public's need for outdoor recreation and open space. Land acquisitions support the BLM strategic goals by providing opportunities for

environmentally responsible recreation and preservation of our natural and cultural heritage. BLM can also more effectively manage natural and cultural resources by consolidating land ownership patterns.

The 2008 Alturas Resource Management Plan identifies acquisition of up to 8,458 acres of PG&E land in the area as a priority management objective. As such, the initial planning and NEPA work has already been completed.

### PROCESSING STEPS

### PLANNING, PROGRAMMING, BUDGETING

- Conduct initial inspection of property. Complete Certificate of Inspection and Possession.
- Conduct Pre-Acquisition Environmental Site Assessment.
- Prepare NEPA document for proposed acquisition and alternatives.
- Prepare decision document.

### **DOCUMENT PREPARATION**

- Obtain title evidence and evaluate title encumbrances.
- Examine adequacy of the legal description for lands to be acquired.
- Obtain appraisal of rights to be acquired.
- Prepare acquisition documents –
- 1. Deed
- 2. Land Acquisition Voucher Certificate, Form 1370-32
- 3. Vicinity Map
- 4. Grantor's Hazardous Materials Certification for Fee Acquisitions (if not included in Environmental Site Assessment as Interview with Landowner)

### TITLE TRANSFER / CLOSING

- For closing in escrow, prepare escrow and closing instructions.
- Obtain preliminary title opinion.
- Execute documents.
- Request payment of consideration.
- Deposit documents in escrow.
- Complete Certificate of Inspection and Possession just prior to closing or recording deed.
- Record deed if not closed in escrow.
- Obtain final title evidence on U.S. ALTA policy form.
- Obtain final title opinion.

### **POST ACQUISITION ACTIONS**

• Request notation of the action to the official land status records.

- Prepare news release announcing completion of the acquisition, if applicable.
- Update real property records, as required.

### **Baseline and Enhanced Land Management**

• Please describe baseline and enhanced management activities or practices identified in your organization's proposed project budget and funding plan.

Baseline management of the parcel would include regular patrolling of the property by law enforcement and other BLM personnel. Timber within the parcel would be inventoried and managed accordingly with best management practices for sustainable healthy forests. These activities are a part of day to day management of public lands managed by the BLM and the AFO has staff members who are trained to complete all tasks necessary to manage this parcel as is.

Enhanced management would be developed through a public planning process in accordance with the National Environmental Policy Act. The AFO recognizes the desire for public access for fishing and other recreational purposes along Fall River and would propose the development of a day use parking lot on the north side of the McArthur Road and a picnic area adjacent to Fall River. A trail would be proposed between the parking lot and picnic area. A pit toilet would be proposed along the trail approximately half way between the parking lot and picnic area. All enhancements would be in compliance with the guidelines set forth by Americans with Disabilities Act.

Potential picnic area

Interpretive signs would be proposed near the picnic area describing the ecological and cultural significance of the area. Interpretive signs would be developed in coordination with the Pit River Tribe.

The AFO would propose that the remainder of the parcel continue to be open space. The combination of a small developed area surrounded by open space would provide an excellent site for environmental education opportunities for local youth.

The parcel would be inventoried for the following resources; cultural and historic sites, noxious weeds, and biological and botanical species. If noxious weeds are present a treatment plan would be established in coordination with Shasta County and the Pit River Tribe. Appropriate habitat improvement projects would be proposed based on the results of botanical and biological surveys. Should any endangered or sensitive species be found within the parcel the AFO would initiate consultation with the United States Fish and Wildlife Service.

An assessment of stream bank stabilization would be completed to determine if restoration efforts are needed.

The AFO would propose to hire a Pit River Tribal member to serve as a cultural monitor for the parcels and hire a contractor to conduct an ethnographic study of the area.

Current fences would be inventoried to determine if any should be removed or modified to encourage wildlife movement through the parcel and improve habitat connectivity.

Should the BLM acquire the approximately 8,000 acres of PG&E land that it is interested in the AFO would seek funding to hire a full time staff member to oversee the management and coordinate community activities of the newly acquired land. This staff member would most likely be co-located in the Hat Creek Ranger District Office. The AFO also proposes share costs for a support fire engine, to be located at the Hat Creek Ranger District Office, in cooperation with the Forest Service.

Within two years of acquiring the parcel the AFO would have the necessary environmental documentation and site development designs in place and would provide the Stewardship Council with a cost share proposal for enhancements within three years of the acquisition.

### Physical Enhancements/Capital Improvements

• Please describe and explain any proposed physical enhancements or capital improvements identified by your organization.

Physical enhancements the BLM would propose are directly in line with the objectives outlined in Volume II of the Land Conservation Plan (LCP) for the Fall River Valley Planning Unit. The LCP calls for the development of a parking lot and day use area for public recreation which includes access for fishing along the Fall River as well as a

picnic area and restrooms. In addition the LCP calls for biological, botanical, and cultural surveys which the BLM also proposes to complete. The AFO would also conduct a noxious weed inventory and develop an appropriate treatment plan in coordination with Shasta County if necessary. Historical and Cultural sites would also be inventoried and protected as needed and where appropriate interpretive signs would also be installed. Timber within the parcel would be managed to reduce fuel loads and meet the goals of a sustainable healthy forest.

Should the BLM acquire this parcel and/or other parcels of interest, a public planning process would be initiated that may take approximately two years to complete. During this time the AFO would also work on securing funding to complete the proposed projects as well as finalize development plans.

There would be onetime development costs for a parking lot, trail, picnic area, restrooms, and interpretive signs, once these facilities are in place the costs for the ongoing maintenance and patrolling of the area would be absorbed into the AFO's annual operating budget.

### **Land Conservation Partners and Youth Opportunities**

• Has your organization identified any potential land conservation partners to be involved in any of the proposed management or enhancement activities, including youth-related activities? If so, please name and describe their proposed role(s) and responsibilities.

Potential partners include:

Pit River Tribe – identification, protection and interpretation of sensitive resources
Spring Rivers Ecological Sciences – assessment of aquatic resources
Fall River Community Services District – youth activities
Fall River Resource Conservation District – site development
California Department of Fish and Game – wild trout program
Trout Unlimited – wild trout program
Cal Trout – wild trout program
Clearwater Lodge – recreation
Shasta County – public access, recreation

### **Public Input**

• Please describe how your organization has considered public input provided to the Stewardship Council to date in the development of this proposal.

This Land Stewardship Plan closely mirrors the preservation and enhancement measures outlined in the Planning Unit Report, the Recommended Concept Table and Map and the Supporting Analysis. We have also reviewed the Public Comments and Responses and have considered them in the development of the Plan.

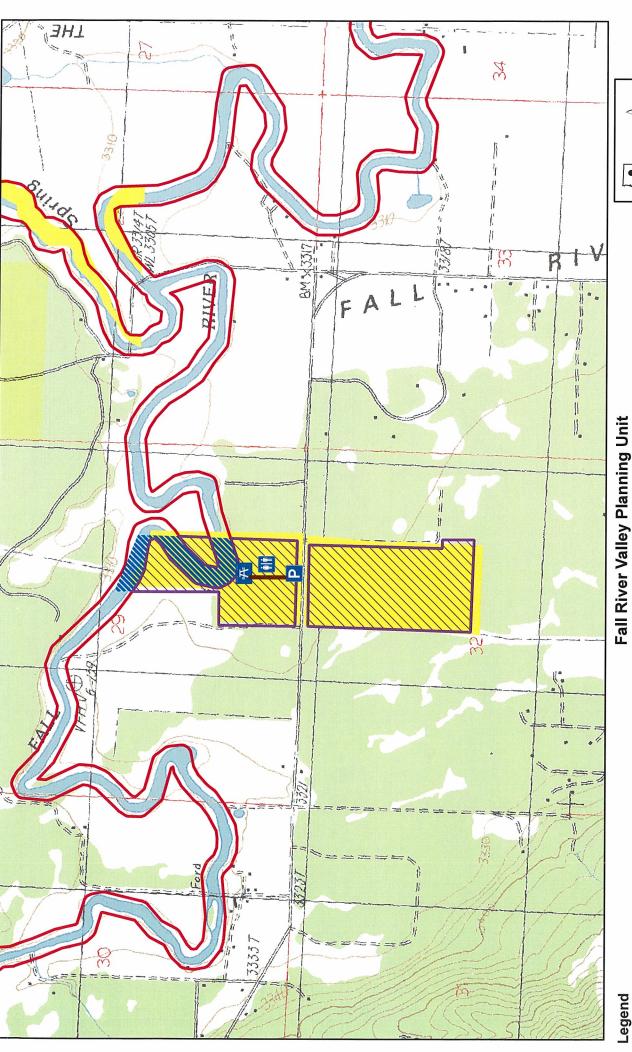

If this parcel were to be acquired by the BLM, the AFO would re-initiate a public planning process in accordance with the National Environmental Policy Act and finalize management proposals.

### **Budget and Funding Plan**

- The BLM would absorb the costs for baseline management of the parcel but would propose a cost share agreement to the Stewardship Council for physical enhancements to the parcel.
- See Budget and Funding Plan (Submittal 2)

### BUREAU OF LAND MANAGEMENT

California State Office 2800 Cottage Way, Suite W-1834 Sacramento, CA 95825 www.ca.blm.gov

2100 (CA-910) P

July 29, 2010

Stewardship Council Attn: Ric Notini Director, Land Conservation Program 15 N. Ellsworth Avenue, St. 100 San Mateo, CA 94401

Dear Mr. Notini:

It is with pleasure that we submit this letter of support for the Alturas Field Office's participation in the Stewardship Council's land conservation process. We are fully aware of the ongoing discussions and coordination between the Field Office and the Stewardship Council staff.

PG&E property associated with the Pit 1 and 3 and the Hat 1 and 2 power projects have long been of interest to the BLM. These properties were identified as a priority for acquisition in the 2008 Alturas Resource Management Plan. Therefore, The California State Office approves the Alturas Field Office's submittal of Land Stewardship Proposals for the following Planning Units:

Fall River Valley Fall River Mills Lake Britton Hat Creek

Thanks for the opportunity to partner with you in this important conservation effort.

James Wesley Abbott Acting State Director

Additional Notes: These costs will be absorbed into the annual operating budget for the Alturas Field Office

Note 1: According to the Stewardship Council's Land Conservation Program Funding Policy, the Stewardship Council will require future land owners to demonstrate that they have the funding and other capacity to maintain that property interest so as to preserve and/or enhance the beneficial values on the Watershed Lands. Exceptions to this guideline will be rare and considered only in circumstances where,

1) The funding of baseline land ownership and management activities will clearly lead to enhancement of the beneficial public values on the lands; and/or,

2) The funding of baseline land ownership and management activities is only temporary ( \$\frac{5}{2}\$ years).
